## LETTER OF COMPANY DIRECTOR

AbdElfatah Saleh

Chemicals for metal plating, since its establishment in 2011 until today, has made a great leap in the field of metal plating technology production and has become famous for its leadership in its regional markets as a specialized company in this field .

Joined by a leading company in the field of metal plating that enters the field of electrical industries (KEMEKO Steel Company) as a joint venture that meets all the needs of the local market, and we seek to globalize through self-development and achieving our self-sufficiency .

CHEMATECH company is a fast growing co., it was established in 2009. It is a combination of different sectors which related to metals surface technology .

Director  
Eng. AbdElfatah Saleh

## ABOUT US OUR COMPANY

CHEMATECH was incorporated with the aim to manufacture, supply and import all chemicals of metal surface technology. Two years ago, it was combined with KEMEKO STEEL CO.

To make a group serve clients by supplying and operation for others .

Our team of researchers is also engaged unremittling in submitting various products with various qualities as per client's requirements. We develop critical products for market by undertaking concurrent research to meet the need of this critical industry. Our efforts were blessed when we got opportunities to associated with esteemed brand as client or supplier .

The consistent growth of CHEMATECH-KEMEKOSTEEL Group in a national market has induced us to excel our work and knowledge in technical expertise and managerial competence. And in Egypt today we are among top most names of electroplating chemicals manufacturer, supplier, and import in addition to electrostatic powder coating and electroplating service for others .

### Our Mission

Our goal is to be the main supplier in the region of high quality products in the field of metal coatings, electrostatic paints, coatings, metalworking and chemicals.

### Our Vision

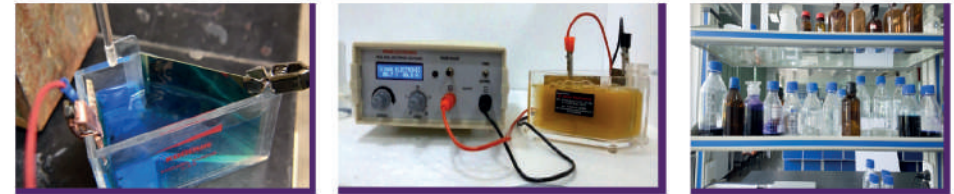

We believe that keeping pace with the latest technology in our field with new innovations will contribute to adding material and moral value to our customers and make their lives more comfortable .

“ Chemicals Import, Manufacture & Trading

“ Analysis for electroplating tanks (titration & hull cell)

“ Measuring coating thickness ( ferrous and nonferrous ) by magnetism ,conductivity and electrolysis devices

“ Measuring coat weight

“ Making training for electroplating, electrostatic powder coating and pretreatments

“ Make all tests for painting  
Impact-cross cut-salt spay-conical binding -glossy

“ Electroplating and painting equipment local and imported

Supply our clients by free mini laboratory for making fast analysis .

Have qualified laboratory for improve our products  
Able to work with our clients on any required specifications .

## KEMEKO STEEL OUR SERVICE

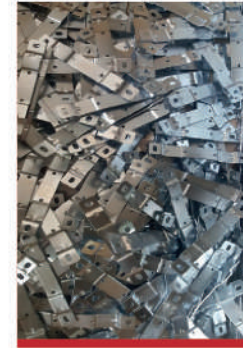

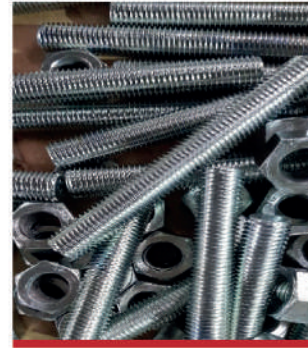

### “ Electrostatic powder coating for others

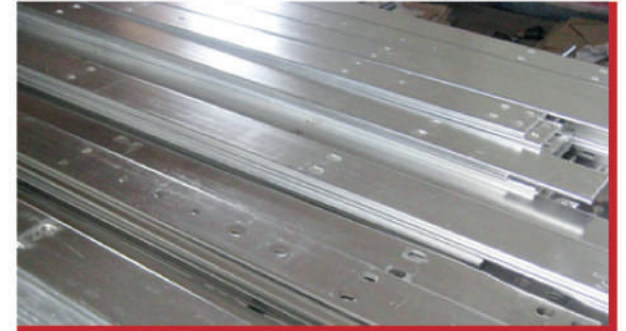

## Galvanization

## Silver plating

## Tin plating

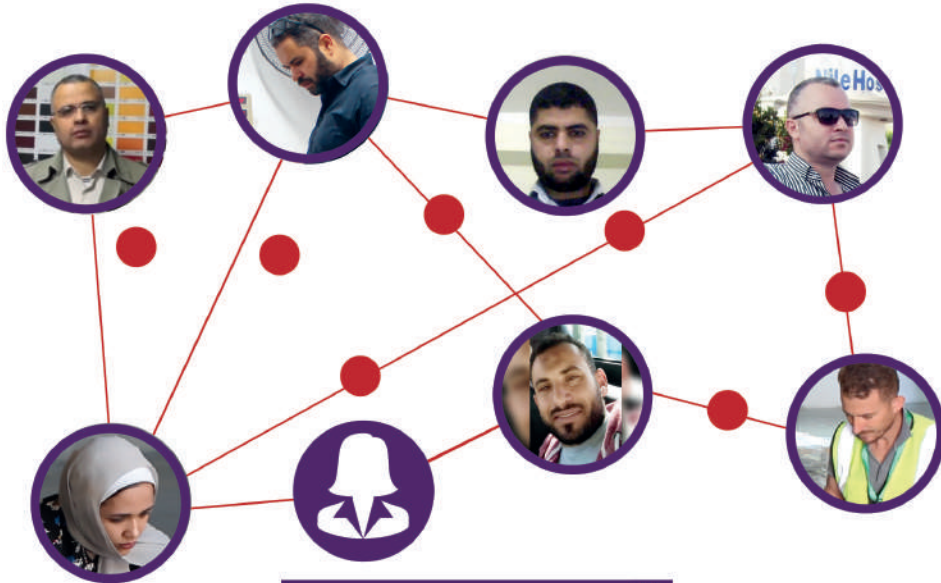

## Metal works

## Wiring
